

# NORTHSHORE RIVERSIDE PARK

Client Port of Brisbane Scope Wayfinding and Signage Timeframe 2007 - 08

Northshore Riverside Park is built on ecologically sustainable design and development principles. The 2.5 hectare park includes an outdoor performance area, an information centre and cafe, barbeque, picnic tables, childrens play, recreational lawns and the Hamilton Port History Walk.

The family of wayfinding signs includes identification, direction, and regulatory signage. The design extends the landscape aesthetic using modular concrete blocks and folded steel plate.
