

# VICTOR TRUMPER STAND • SYDNEY CRICKET GROUND

Client Sydney Cricket and Sports Ground Trust Scope Wayfinding Masterplan, Signage Design, Documentation  
Timeframe August – December 2008

The Victor Trumper Stand at the Sydney Cricket Ground was designed by Cox Architects and completed in December 2008. The wayfinding system focuses on information, directional and both level and bay identification signage to assist a high volume of spectators navigate

within the stand and gain access to the adjoining stands.

The longer term plan is to use this system as design standards to update the wayfinding signs throughout the Sydney Cricket Ground (SCG) into a more logical, legible and coordinated system as the needs arise.
